- Storage limitations per seat
- No video recording on lower plans
- No API access except on Business plan
- No SSO except for enterprise
- No custom speech models for smaller plans
- Dedicated support only for enterprise

#### ADDITIONAL LIMITATIONS

- △ No offline functionality
- △ Limited transcription credits on free plan
- △ Storage limitations per seat
- △ No video recording on lower plans

## **Frequently Asked Questions**

### **What is Fireflies.ai?**

Fireflies.ai is a tool powered by AI that provides intelligence for voice conversations and notetaking services. It can record, transcribe, and analyze voice dialogues, and is equipped with features that allow for search within text, generation of meeting transcripts, identification of key points discussed during meetings, and collaboration with team members.

---

### **How does Fireflies.ai record and transcribe conversations?**

Fireflies.ai records and transcribes meetings by being invited into meetings or automatically joining calls on a user's calendar. It then captures video and audio, across various video-conferencing applications, dialers, and audio files, generating transcripts of the meetings.

---

### **How long does it take Fireflies.ai to generate transcripts?**

The specific timeframe for transcript generation is not specified on their website. However, considering the advanced AI technology of Fireflies.ai, it can be inferred that this process is quick and efficient, likely generating transcripts in a matter of minutes.

---

### **Can Fireflies.ai be used to capture video and audio?**

Yes, Fireflies.ai can be used to capture both video and audio during meetings. It also generates transcripts from these recordings.

---

### **Does Fireflies.ai have a search feature?**

Yes, Fireflies.ai has an AI-powered search feature which enables users to review, filter, and listen to specific topics discussed during meetings.

---

### **How does Fireflies.ai's AI-powered search work?**

Fireflies.ai's AI-powered search works by sifting through recorded and transcribed meeting data. The feature allows users to review a full-hour meeting in just five minutes and quickly identify key metrics such as action items, tasks, and questions with a single click.

---

### **Can you review a meeting using Fireflies.ai?**

Yes, Fireflies.ai enables users to carry out detailed reviews of a meeting. Its AI-powered search feature allows users to thoroughly search for and examine various aspects of a meeting, from tasks to key questions.

---

### **Can Fireflies.ai identify the action items in a meeting?**

Indeed, Fireflies.ai can identify action items in a meeting. With a single click, users can view action items, tasks, questions, and other key metrics identified during a meeting.

---

### **Can I add comments and reactions to parts of conversations using Fireflies.ai?**

Yes, Fireflies.ai provides a feature that allows users to add comments, pins, and reactions to specific sections of a conversation. Users can also share meeting notes with their favorite collaboration apps like Slack, Notion, Asana and more.

---

### **Can you create tasks with voice commands in Fireflies.ai?**

Yes, within Fireflies.ai, users can create tasks with voice commands. The tasks are automatically created within applications like Asana, Trello, and Monday.com using voice commands during meetings.

---

### **How does Fireflies.ai help with conversation analysis?**

Fireflies.ai aids conversation analysis through its conversation intelligence feature. It can track speaker talk time, sentiment, monologues, and more, helping teams to understand their internal processes and performance. With custom topic tracking, Fireflies.ai can identify key themes discussed during meetings.

---

### **Can Fireflies.ai track speaker discourse?**

Yes, Fireflies.ai tracks speaker dialogue, providing metrics like talk time, sentiment, and monologues. Teams can use these insights for team building, performance improvement, and training.

---

### **Can you customize topic trackers in Fireflies.ai?**

Yes, In Fireflies.ai, users can customize topic trackers. This enables them to track and examine specific themes or key points during a meeting.

---

### **Can Fireflies.ai be used to automate workflows?**

Fireflies.ai is designed to automate workflows. By leveraging AI, it fills out CRMs, creates tasks with voice commands, and shares recaps of meetings to various platforms. This reduces the manual labor required during and after meetings, freeing up time for more essential tasks.

---

### **How does Fireflies.ai integrate with collaboration apps like Slack, Notion, and Asana?**

Fireflies.ai integrates seamlessly with collaboration apps such as Slack, Notion, and Asana. It allows users to add comments, pins, and reactions to specific parts of conversations, share soundbites, and dispatch meeting recaps to these applications, fostering productive team collaboration.

---

### **What is the real-time knowledge base in Fireflies.ai?**

Fireflies.ai's real-time knowledge base is a self-updating repository created from voice conversations. It aids users in organizing meeting recaps by department, making the information quickly discoverable. Furthermore, it provides custom privacy controls to ensure meeting information visibility is controlled.

---

### **Does Fireflies.ai provide talk time and sentiment metrics?**

Fireflies.ai indeed provides talk time and sentiment metrics. The platform tracks speaker talk time, sentiment, monologues, and other key metrics. These provide insights to teams for coaching teammates and improving internal processes.

---
