Frequently Asked Questions

What is Hirex.ai?

Hirex.ai is a no-code AI platform enabling businesses to create voice-based bots for conducting and scoring interviews at a large scale. The platform includes an extensive range of assessment tools, providing solutions like search and resume parsing, AI proctored coding, and MCQ assessments, amongst others. Hirex.ai has been featured in several publications and has earned the title of the most promising startup.

How does Hirex.ai work?

Hirex.ai works by automating much of the interview process. It eliminates human intervention in the initial interview stages, reducing potential bias and making the process more equitable. This is done using various tools such as voice-based bots, AI-enabled talent management solutions including search and resume parsing, and automated HR processes.

What features does Hirex.ai provide for recruitment?

Hirex.ai provides several features to streamline recruitment. These include conducting coding interviews, running MCQ tests, setting up hackathons, organizing video interviews, deploying WhatsApp chatbots, and voice-based bots for the initial interviews. It also offers search and resume parsing, AI proctored coding and MCQ assessments, ATS automation, and supports HCM or HRIS integration.

What do the voice-based bots in Hirex.ai do?

The voice-based bots in Hirex.ai conduct level one interviews. They're designed to manage common recruitment bottlenecks such as misunderstanding of skill requirements, inconsistency in selection criteria, and interviewer bias. These bots permit businesses to conduct more than 10,000 interviews a day, minimizing human intervention.

How does Hirex.ai help reduce bias in hiring processes?

Hirex.ai reduces bias in hiring processes by automating level one interviews. By using voice-based bots to conduct these initial interviews, human error, potential bias, or inconsistency in selection criteria are removed. This ensures that selection is purely based on merit, making the hiring process more equitable and inclusive.

Can I integrate Hirex.ai with Facebook, Gmail, WhatsApp, Twitter, Outlook, and LinkedIn?

Yes, Hirex.ai integrates with popular tools like Facebook, Gmail, WhatsApp, Twitter, Outlook, and LinkedIn. This feature allows businesses to access its functionalities with ease, enhancing the process of candidate sourcing, engagement, and communication.

What is the maximum number of interviews Hirex.ai can conduct in a day?

Hirex.ai can conduct more than 10,000 interviews in a single day with minimal human intervention, thanks to its voice-based bots and high scalability.

What kind of assessments can I conduct using Hirex.ai?

With Hirex.ai, you can conduct a variety of assessments. These include coding interviews, MCQ tests, hackathons, video interviews and WhatsApp chatbot assessments. This gives you flexibility and a comprehensive process for itemizing candidate strengths and skills.

Can Hirex.ai conduct remote interviews?

Yes, Hirex.ai can conduct remote interviews. It offers tools for conducting video interviews, supporting businesses in their remote recruitment strategies and in reaching wider talent pools.

Does Hirex.ai provide search and resume parsing features?

Yes, Hirex.ai provides search and resume parsing features. These AI-enabled talent management solutions help businesses streamline their recruitment process, enhance candidate matching, and save valuable time.

Does Hirex.ai offer support for HCM or HRIS integration?

Yes, Hirex.ai provides RESTful API support for HCM or HRIS integration. This allows for a seamless integration of Hirex.ai into your existing human resources information system.

What is the purpose of WhatsApp chatbots in Hirex.ai?

The purpose of WhatsApp chatbots in Hirex.ai is to provide an additional channel for conducting assessments. They can also be used for engaging with candidates, improving the communication process and candidate experience.

How does Hirex.ai ensure the interview process is equitable and inclusive?

Hirex.ai ensures an equitable and inclusive interview process by automating the first stage of interviews. It eliminates potential human bias and inconsistency in the selection process, making it more merit-based and fair.

What role do AI proctored coding and MCQ assessments have in Hirex.ai?

The role of AI proctored coding and MCQ assessments in Hirex.ai is to evaluate candidates' coding abilities and knowledge effectively. The AI-enhanced tools ensure accurate results and enable real-time assessment for better decision-making in the hiring process.

How can Hirex.ai streamline my company's recruitment process?

Hirex.ai can streamline your company's recruitment process by automating the initial stages of interviews using voice-based bots, conducting thousands of interviews a day with minimal human intervention. It also offers tools like AI proctored coding and MCQ assessments, as well as search and resume parsing, to enhance the efficiency of your recruitment process.

What makes Hirex.ai suitable for both startups and enterprises?

Hirex.ai is suitable for both startups and enterprises due to its scalable capabilities. It can conduct a large number of interviews a day, is easily integrated with popular tools, provides a wide variety of assessments, and automates the hiring process to improve efficiency and inclusivity.

Can Hirex.ai handle the first round of interviews for my company?

Absolutely, Hirex.ai can handle the first round of interviews for your company. It uses voice-based bots to conduct these interviews, allowing for a high volume of interviews to be conducted daily with minimal human involvement, ensuring a fair and unbiased initial interview stage.

What automation features does Hirex.ai offer?

Hirex.ai offers several automation features to streamline your hiring processes. These include voice-based bots for level one interviews, AI-enabled talent management solutions, AI proctored coding and MCQ assessments, and ATS automation. All these tools reduce human intervention and make the hiring process efficient and unbiased.

How can Hirex.ai make the initial round of interviews fair for all applicants?

Hirex.ai can make the initial round of interviews fair for all applicants by automating this stage with voice-based bots. The bots ensure that human errors, potential bias, or inconsistency in selection criteria are minimized, ensuring candidates progress based on merit.

Can I request a free demo for Hirex.ai?

Yes, you can request a free demo for Hirex.ai. The platform encourages potential users to explore its benefits and tools before making a commitment.
