## What It Does

GitHub Copilot is the original AI pair programmer, developed by GitHub and OpenAI. It offers real-time code completions, function generation from comments, and now a full chat interface in IDEs. Available in VS Code, Visual Studio, JetBrains, Neovim, and more. Copilot Enterprise adds codebase indexing for large organizations. Free for verified students and open-source maintainers.

### CONTENT QUALITY

93/100

### USEFULNESS SCORE

94/100

## Pros

### + What Works Well

- + Widest IDE support
- + Real-time inline suggestions
- + GitHub repository integration
- + Free for students and OSS maintainers
- + Multi-language support

## Cons

### – Limitations to Consider

- Paid for most users (\$10-19/mo)
- Sometimes suggests outdated code patterns
- Privacy concerns with private code

---
