What It Does

Ollama is an open-source tool that makes running large language models locally on your computer as easy as running a single command. It supports Llama 3, Mistral, DeepSeek, Phi, Gemma, and dozens of other models, providing a local API that works with most AI applications. It's the easiest way to run private, free AI locally.

CONTENT QUALITY

85/100

USEFULNESS SCORE

88/100

Pros

+ What Works Well

- + One-command model installation
- + Completely private — no data leaves your machine
- + Free to use
- + Wide model support
- + Local API compatible with OpenAI API

Cons

— Limitations to Consider

- Requires powerful hardware for large models
- No mobile support
- Technical setup needed
