- Limited Support - 1-3 business days
- High upfront pricing
- Weak data usage transparency
- Only usable after payment
- Limited application formats
- Restrictions on embedding

ADDITIONAL LIMITATIONS

- △ Requires prior definition of needs
- △ Dashboard access needed
- △ Undefined timeframe for development
- △ Charges for storage and bandwidth

Frequently Asked Questions

How does the Appomate platform work?

Appomate works by providing users with AI-powered tools to define and refine their AI automation needs. The specifics are processed by a dedicated AI team which then establishes a tailor-made workflow based on the requirements. Further, users can test the apps or agents within a sandboxed environment. Upon satisfaction and payment, the app or agent is created and deployed by the AI and development team, accessible from Appomate's dashboard or via a public URL.

What kind of AI-powered tools does Appomate provide?

Appomate offers a suite of AI-powered tools that help users define their requirements, which may include idea automation and workflow streamlining. The tools also allow users to describe their needs and have them processed by a dedicated AI team. Users can also design screens, define the workflow, and test everything within a sandbox environment.

How can I define my requirements on Appomate?

Users of Appomate define their requirements by using the platform's AI-powered tools. They describe their ideas or needs for task automation or workflow streamlining to get started.

What is the role of the dedicated AI team in Appomate?

The dedicated AI team in Appomate processes user requests after they define their requirements using the AI-powered tools provided by the platform. The team sets up an adaptable workflow based on these specifics and also takes care of the creation and deployment of the app or agent after the user makes a payment.

What does the 'Try before you buy' framework in Appomate mean?

The 'Try before you buy' framework in Appomate is a flexible scheme that allows users to test the functionality of apps or agents within a sandboxed environment before making a payment. This ensures optimal functionality and eliminates dissatisfaction post purchase.

How can I test the apps or agents in Appomate?

In Appomate, users test the apps or agents within a sandboxed environment. This is part of the 'Try before you buy' framework, which allows users to ensure the app's or agent's functionality and efficiency before proceeding with a purchase.

What happens when I'm satisfied with the app or agent on the Appomate platform?

Once a user is satisfied with the app or agent on the Appomate platform, they can choose a pricing plan and make a payment. The AI and development team then creates and deploys the app or agent which the user can access through the Appomate dashboard or via a public URL.

How is the app or agent deployed after payment?

After the payment is made, the app or agent is developed by the dedicated AI and development team in Appomate. Once developed, the application is deployed and can be accessed either from Appomate's dashboard or via a unique public URL.

Can I integrate the app or agent from Appomate into my website?

Yes, Appomate provides seamless integration of the AI app or agent with your website. It's designed to empower your users by enhancing your platform with advanced AI functionality.";

What is the revenue-sharing feature on the Appomate platform?

The revenue-sharing feature in Appomate presents users with a percentage of every sale generated from the app or agent they commissioned. This is designed to encourage users to commission more projects.

How do I gain access after my app or agent is created on Appomate?

After Appomate's AI and development team create your app or agent, you gain access either from Appomate's dashboard or via a designated public URL.

How does payment work in Appomate?

In Appomate, users make a payment for the creation and deployment of the app or agent. The payment is made post satisfaction with the app/agent design and functionality, as validated in their sandbox environment. Prices vary depending on the user's chosen pricing plan.

Do I get a share from the sales of the app I commissioned on Appomate?

Yes, Appomate offers a revenue sharing feature where you will earn a percentage from every sale generated from the app or agent you have commissioned.

Do I require coding knowledge to define my unique AI automation needs on Appomate?

No, you do not need coding knowledge to define your unique AI automation needs on Appomate. The platform provides AI-powered tools to help users describe their requirements, which are then implemented by a dedicated AI team.

How does the sandbox environment in Appomate work?

The sandbox environment in Appomate allows users to test the functionalities of their custom-built AI apps or agents in a controlled and secure environment. This ensures the apps or agents work as expected before the user makes a purchase.

How customizable is the workflow in Appomate?

In Appomate, the workflow is highly customizable, allowing it to be tailored to the user's preferences. The AI & product team analyzes the user's request and defines an adaptable workflow, which users can edit to their liking."
