## **Frequently Asked Questions**

### **What is the main function of Glorify?**

Glorify's primary function is to serve as an online graphic design tool specifically created for e-commerce business owners. It empowers users to construct professional and high conversion social media posts, ads, infographics, presentations, and more.

---

### **How do AI-powered features work in Glorify?**

Glorify's AI-powered features utilize advanced artificial intelligence algorithms to automate and enhance the design process. Features include AI Images for generating visuals from text prompts, AI Product BG for placing products into AI-synthesized scenes, and AI Writer for producing compelling copy for designs.

---

### **Can Glorify generate images from a text prompt?**

Yes, Glorify has a feature called AI Images that can generate any image from a text prompt. This capability allows users to produce diverse and imaginative graphics simply by providing text input.

---

### **What is AI Product BG in Glorify?**

AI Product BG in Glorify is a tool powered by Pebblely that enables users to insert products into AI-generated scenes. This feature dials up cost efficiency by eliminating the need for multiple photoshoots, yet still creating high-quality visuals for businesses.

---

### **Can I write copy with Glorify?**

Yes, Glorify features an AI Writer which can generate high converting copy for designs. This is valuable for users who may need assistance with content creation, as the tool uses AI to produce engaging titles, descriptions, and more.

---

### **Does Glorify have a background removal feature?**

Yes, Glorify includes a Background Remover feature, powered by Clipping Magic, which allows users to remove backgrounds from product and non-product images. This helps in emphasizing the product and crafting product-sharp images that stand out.

---

### **How does batch editing work in Glorify?**

Glorify's Batch Editing tool allows users to create and adjust designs at scale. With this feature, users can generate multiple designs from a single prompt and modify them with just a few clicks, thereby achieving extensive, high-volume production of visuals quickly.

---

### **What type of templates can I find in Glorify?**

Glorify hosts a catalogue of over 11,000 customizable templates for numerous themes and purposes. These templates offer an expedited start to designing high-quality social media posts, ads, presentations, web pages, banners, and more.

---

### **Does Glorify offer image editing tools?**

Yes, Glorify provides easy-to-use image editing tools that allow users to make their products pop. Users can remove backgrounds, add depth with realistic shadows and reflections, annotate product images professionally, and more.

---

### **Can I access premium stock photos through Glorify?**

Yes, with Glorify, users can access premium stock photo libraries. These libraries contain photos, images, and graphics that can be used for commercial purposes. They encompass diverse categories including people, places, objects, activities, landscapes and more.

---

### **Does Glorify support team collaboration and if so, how?**

Definitely, Glorify supports team collaboration offering features that allow designers to organize their design files into projects. It also facilitates the creation of folders, invitation of team members & guests for easy coordination

and collaboration within the tool.

---

### **What features are planned for future updates in Glorify?**

Glorify's future updates include the integration of a video editor, live collaboration features, batch processing, a plugin marketplace, and the addition of more AI-centered tools.

---

### **What is this video editing feature Glorify plans to add?**

Glorify is working on the integration of an intuitive yet powerful video editor into the tool as part of its future updates. However, details about the specifics of how this feature will function are not provided.

---

### **What is the process for creating e-commerce ads, banners and posts in Glorify?**

Using Glorify, e-commerce ads, banners and posts can be created in merely 6 seconds. This is made possible by leveraging Glorify's large library of customizable templates, easy image editing tools, and AI-powered features.

---

### **Does Glorify have a feature for organizing design files?**

Yes, Glorify has a feature for organizing design files into projects. Teams can create folders and invite team members or guests for easy collaboration, making it straightforward to manage, share, and streamline the workflow of design projects.

---

### **What is the purpose of the Background Remover feature in Glorify?**

The Background Remover in Glorify is a feature designed to remove backgrounds from products and images like a professional. This helps to highlight the products making them stand out with clear and enhanced visuals which can be further embellished with shadow reflections, annotations, etc.

---

### **Can Glorify generate any image from a text prompt?**

Absolutely, through the AI Images feature, Glorify can generate any image from a text prompt. This simplifies the design process, as users only need to provide a text prompt and the AI powers the graphic creation.

---

### **Are there any AI tools planned for future updates in Glorify?**

In future updates, Glorify plans to expand its AI capabilities even further. Although specific upcoming AI tools aren't specified, it's mentioned that these will contribute towards enhancing generative imagery, photo editing and text generation.";
