- ai agent
- open source
- secure
- lightweight
- local ai

## What It Does

SafeClaw is an open-source project providing OpenClaw's core features while eliminating prompt injection vulnerabilities and reducing attack scope. Designed for security-conscious users who want a simpler, safer autonomous AI assistant.

## Pros

### + What Works Well

- + Minimal attack surface
- + Prompt injection protection
- + Simpler codebase to audit
- + Free and open-source

## Cons

### – Limitations to Consider

- Limited features vs OpenClaw
- Small community
- Early-stage project
