- Dependent on user's ordering patterns
- No offline functionality mentioned
- Reliant on procurement data availability

#### ADDITIONAL LIMITATIONS

- △ Specific to food businesses
- △ No API mentioned
- △ No multi-language support mentioned
- △ Doesn't specify data security measures

## **Frequently Asked Questions**

### **What is Chat Z and who created it?**

Chat Z is an Artificial Intelligence (AI) tool created by Zitti. It functions as a digital assistant, offering powerful automation for procurement in food businesses.

---

### **What industries does Chat Z cater to?**

Chat Z primarily caters to the food industry, especially restaurants and other food businesses.

---

### **How does Chat Z's automation help in food business procurement?**

Chat Z's automation enhances food business procurement through real-time food pricing across multiple vendors, price trend analysis, automated ordering based on user preferences, and negotiation assistance for better prices. It also helps users to find the best value for their money by comparing products and vendor offerings.

---

### **How does Chat Z function as a virtual Sous Chef?**

Chat Z acts as a virtual Sous Chef by interacting with procurement data to optimize purchasing decisions. It proactively tracks price fluctuations across vendors and suggests alternatives or optimizations based on cost and previous orders.

---

### **How does Chat Z optimize purchasing decisions?**

Chat Z optimizes purchasing decisions by leveraging AI to interact with your procurement data. It compares real-time food prices across various vendors, analyzes price trends, and places orders automatically based on the user's preferences.

---

### **In what ways can Chat z maximize cost savings?**

Chat Z maximizes cost savings by providing assistance in negotiating better prices, offering tailored suggestions based on past orders to further reduce expenses, and identifying the most significant price variations across suppliers.

---

### **Can Chat Z provide real-time food prices from multiple vendors?**

Yes, Chat Z offers a feature to compare real-time food prices from multiple vendors.

---

### **How does Chat Z analyze price trends?**

Chat Z analyzes price trends by processing and comparing price data from various vendors over time. It highlights fluctuations and trends which can inform user's procurement decision-making.

---

### **Is automated ordering based on user's preferences available in Chat Z?**

Yes, automated ordering based on user's preferences is a feature of Chat Z. It places orders automatically according to assessed needs and user-defined preferences.

---

### **Does Chat Z help in negotiating better prices with vendors?**

Yes, Chat Z can assist in negotiating better prices. It tracks vendor pricing and uses that information to extract more valuable deals.

---

### **Can Chat Z compare different vendor offerings?**

Yes, Chat Z is capable of comparing different vendor offerings, helping users find the best value for their money.

---

### **Does Chat Z suggest purchases based on past orders?**

Yes, Chat Z offers intelligent suggestions for purchases, tailored to an individual business's needs based on past orders.

---

### **Can Chat Z identify significant price variations across suppliers?**

Yes, Chat Z has the capability to identify significant price variations across suppliers, enabling users to optimize their procurement accordingly.

---

### **How can I use Chat Z to explore potential in my procurement data?**

Chat Z allows users to explore their procurement data's potential by comparing real-time food prices, analyzing price trends, providing negotiation assists for better rates, comparing product offerings, and suggesting purchases based on past orders.

---

### **How does Chat Z help in making smarter ordering decisions?**

Chat Z helps make smarter ordering decisions by comparing real-time prices, analyzing price trends, and offering automated ordering based on user preferences.

---

### **Can Chat Z provide insights into my procurement data?**

Yes, Chat Z can provide insights into your procurement data through its various features such as real-time price comparison, price trend analysis, product comparison, automated ordering, and cost-saving suggestions.

---

### **Does Chat Z offer a way to directly place orders from a comparison list?**

Yes, Chat Z offers a way to directly place orders once it has compared food prices across vendors.

---

### **Can Chat Z help me find the best value for my money?**

Yes, Chat Z helps users find the best value for their money by comparing products and offerings from different vendors and offering assistance in negotiating better prices.

---

### **What kind of support does Zitti offer to Chat Z users?**

Zitti, the creator company of Chat Z, asks users for details about their restaurant and promises to respond shortly, indicating an approachable and supportive customer service.
