- △ Mandatory subscription
- △ No on-premise deployment

Frequently Asked Questions

What is Brinner?

Brinner is an advanced AI tool explicitly developed to enhance the hiring process. It automates candidate search and resume comparisons, streamlining recruitment workflow for human resources.

How does Brinner enhance the recruitment process?

Brinner enhances the recruitment process using its AI capabilities to automate resume comparisons and candidate search. The unique features of Brinner include analyzing job descriptions and extracting key criteria for candidate screening. It also provides suggestions to make job descriptions more appealing and recommends which criterias should be considering mandatory or preferred.

How does Brinner integrate with HR software?

Brinner integrates seamlessly with top HR software solutions thereby ensuring a streamlined recruitment workflow. This integration facilitates the automation of various recruitment tasks within the existing HR software environment, including resume screening, candidate search, and job description analysis.

How fast can Brinner screen resumes?

Brinner is capable of screening hundreds of resumes within a matter of minutes. This speed enhances the overall hiring process, saving HR professionals valuable time and workforce resources.

What features do Brinner offer to customize the recruitment process?

Brinner offers personalized criteria setting features that allow users to tailor the recruitment process according to their standards. Users can modify, delete or add criteria that they deem less important or more important. Additionally, Brinner helps in the creation of job descriptions and distinguishes between mandatory and preferred requirements for more precise candidate screening.

Can I add additional screening criteria in Brinner?

Yes, Brinner allows users to add additional screening criteria that are not mentioned in the job description. It enables recruiters to customize their selection process according to their specific needs and preferences.

How does Brinner rank candidates?

Brinner ranks candidates based on how they align with the role profile. Utilizing refined AI-driven filters that analyze candidates based on unique recruiting parameters, Brinner gives a dynamic ranking according to various factors such as mandatory or preferred requirements.

Does Brinner offer real-time screening of applicant profiles?

Yes, Brinner offers real-time screening of applicant profiles. Its AI-driven system efficiently and in real-time sorts through profiles, filtering out those who don't meet the specified criteria.

Can I get detailed reports for each candidate?

Yes, with Brinner, users can access detailed reports for each candidate. These reports provide insights that help decide whether to proceed with an interview. Each candidate report justifies the assessment points and gives recruiters clear indications of the candidate's suitability for the role.

How does Brinner's tailored filters work?

Brinner's tailored AI filters work by analyzing candidates based on the unique recruitment parameters set by the user. It ensures a highly targeted candidate search, extracting and organizing key information from each resume to speed up the initial screening phase.

How does Brinner optimize job descriptions?

Brinner optimizes job descriptions by using AI to analyze and extract key criteria for screening candidates. It categorizes the criteria into areas such as work experience, education, skills, and others. Additionally, the AI provides suggestions to make job descriptions more appealing and recommends which criteria should be considered mandatory or preferred.

How do users classify screening criteria as mandatory or preferred in Brinner?

In Brinner, users classify screening criteria as either mandatory or preferred during the criteria setting process. This feature gives users the flexibility to ensure that the process aligns perfectly with their recruitment standards and methods.

What is the purpose behind Brinner's dynamic candidate ranking?

The purpose behind Brinner's dynamic candidate ranking system is to provide users with a more targeted, efficient, and transparent recruitment process. The system ranks candidates according to various factors, including their alignment with mandatory or preferred requirements. This allows for more precise, relevant candidate selection.

Does Brinner offer a trial period?

Yes, Brinner offers a trial period where you can screen up to 25 candidates for free. This helps users to experience how Brinner can streamline the recruitment process without the need for immediate commitment.

What happens if I exceed my candidate limit?

If you reach the limit of candidates for your chosen plan, Brinner's system is set to stop accepting new candidates to avoid unexpected charges. However, to ensure uninterrupted service, you have the option to enable automatic addition of additional applicants to your current billing period at a rate of \$12.95 per 100 candidates.

Can I change my Brinner subscription plan?

Yes, you can change your Brinner subscription plan at any time to match your recruitment needs. The flexibility makes it simple to upgrade or downgrade according to shifting requirements.

What customer support does Brinner offer?

Brinner offers dedicated email support for all plans. Furthermore, for a more personalized support experience, users can book a meeting. Thus, Brinner ensures a thorough customer support experience for its users.

What payment methods does Brinner accept?

Brinner accepts credit card payments for all transactions. For payments over \$1,000, ACH payment options are also available.

What is Brinner's refund policy?

Brinner generally does not issue refunds. However, in the situation where you cancel your subscription and haven't received any applicants at all, a refund will be issued.

How can Brinner reduce my hiring costs?

Brinner reduces hiring costs by providing AI-powered resume screening which drastically reduces the time spent on manual screening. Furthermore, the quick and efficient analysis of resumes ensures that only the most suitable candidates are shortlisted for interviews, thereby reducing resource wastage and costs associated with the hiring process.
