- Requires Discord for reach
- Limited to 3D characters

ADDITIONAL LIMITATIONS

- △ Focuses on gaming and anime
- △ No character personality customization
- △ Limited filtering options
- △ No integration with other apps

Frequently Asked Questions

What is Holoworld?

Holoworld is a comprehensive platform that enables users to generate and interact with 3D characters in various situations. The platform is used for socializing, gaming, and creative exploration, with a concentration on global user connectivity. Holoworld also enables the creation of intelligent avatars with customizable features that can be utilized in numerous formats. It boasts a 'Creator mode' for individuals interested in creating their unique characters and narratives. It displays AI...

How does Holoworld utilize AI?

Holoworld uses AI to assist aspects of its platform, particularly in the creation and interaction processes with 3D characters. The intelligent avatars created utilize AI for a more personalized and real-like experience. These AI avatars can stream, engage, and even earn, functioning autonomously.

What features does Holoworld offer for streaming?

Holoworld provides an AI-assisted feature for streaming. Intelligent 3D characters on the platform can stream, engage, and also earn 24/7. These features contribute to providing an immersive user experience and can be used for entertainment or monetization purposes.

How can I create 3D characters on Holoworld?

In Holoworld, users can create 3D characters via the 'Creator Mode'. This feature allows users not only to generate unique characters but also to create story-driven premises around these characters, thereby offering a personalized experience. Customizable settings are available, which can be utilized in various formats.

Can I interact with characters in Holoworld?

Yes, users can interact with characters in Holoworld. Interaction can take place in several contexts, including chatting with favorite characters and exploring new creations. The platform supports different modes like 'Home', 'Avatar', and 'Creator', each offering unique interaction aspects.

What kind of customization capabilities does Holoworld offer?

Holoworld provides extensive customization capabilities. Users can generate intelligent avatars, ranging from the appearance, category, and script lines. These avatars can be customized and used across various formats. 'Creator mode' is a key function, enabling users to craft their characters and narratives.

What is the 'Creator mode' in Holoworld?

'Creator mode' in Holoworld is a distinct feature that allows users to create their own characters and narratives. It provides a platform for users to express their creativity, with built-in customization capabilities and options to define their characters' appearance, personas, and storylines.

How can Holoworld be used for gaming or socializing?

In Holoworld, users can socialize and game by interacting with their favorite characters. The platform has a multifaceted arena where users can explore new creations, play games, or simply chat with preferred characters. The platform seeks to connect users globally, fostering a virtual community.

Can I link my Discord with Holoworld?

Yes, users can link their Discord accounts with Holoworld. This allows for smoother integration and extends their reach within the platform, further promoting user interaction and engagement.

How can I filter or sort characters in Holoworld?

In Holoworld, users have the option to filter and sort characters based on different categories. This includes filtering by categories like anime, games, and movies, providing a more manageable and personalized searching experience for users.

What kind of renowned personalities from different fields does Holoworld showcase?

Holoworld showcases AI versions of famous personalities from various fields. These include entrepreneurs, innovators, and co-founders from leading industries. While these AI versions are currently unclaimed, they symbolize the potential of Holoworld to incorporate monumental figures into the virtual ecosystem.

What is character streaming in Holoworld?

Character streaming in Holoworld refers to the ability of AI-generated characters to stream content. These intelligent 3D characters, with their autonomous functioning, can stream, engage, and earn round the clock, enhancing content provision in the platform.

How can users earn on Holoworld?

Users can earn on Holoworld through their created 3D AI characters. The characters can stream and engage with users from around the globe 24/7, thereby generating earnings for the user. It transforms the platform into more than just a space for creation and gaming but also into a potential revenue source.

Does Holoworld offer features to interact with Anime characters?

Yes, Holoworld offers features to interact with Anime characters. Users can categorize, sort, and choose from a variety of Anime characters, facilitating interaction with their favorite characters in a versatile and engaging manner.

How does Holoworld integrate entertainment and creativity?

Holoworld integrates entertainment and creativity through its holistic platform, enabling users to interact, create, and stream content with AI-powered 3D characters. Users can apply their creativity in creating customized avatars and narratives, while the platform's streaming, gaming, and socializing features deliver comprehensive entertainment.";
