- △ Anonymous interaction discomfort
- △ Potential communication misunderstandings

Frequently Asked Questions

What is Giftit?

Giftit is an Artificial Intelligence tool designed to aid users in selecting appropriate gifts. This tool accomplishes this task by initiating automatic, anonymous conversations with users' contacts using a persona named 'Sherlock'. These exchanges enable Giftit to pinpoint possible gift items that the recipients would appreciate.

How does Giftit identify potential gift items?

Giftit identifies potential gift items through the automated and anonymous conversations that 'Sherlock' conducts with the user's selected contacts. Based on the responses, 'Sherlock' understands the likes, dislikes, and preferences of the contact, helping it recommend the most suitable gifts.

What is the role of 'Sherlock' in Giftit?

In Giftit, 'Sherlock' is an engaging persona that conducts anonymous conversations with users' contacts through popular messaging platforms. These interactions enable Sherlock to understand each contact's preferences and suggest ideal gifts accordingly.

Can Giftit be used for different occasions?

Yes, Giftit can be utilized for a wide range of occasions. It's perfect for birthdays, graduations, or even spontaneous moments when users feel like gifting their friends or family.

How anonymous is the interaction between Sherlock and my friends?

The interaction between Sherlock and friends is completely anonymous in Giftit. This means that the contacts Sherlock is chatting with don't know that they are speaking to an AI persona. They can freely express their preferences, likes, and dislikes making the gift suggestions more accurate.

How can I view the results after Sherlock's interaction with my friend?

After Sherlock's interaction with a user's contact, the user can view the results through an AI-generated summary or by reading the full transcript of the conversation. This data helps the user decide on the perfect gift.

What messaging platforms does Sherlock operate on?

Sherlock is programmed to operate on popular messaging platforms such as WhatsApp and iMessage, enabling the users to engage their contacts conveniently.

What made users positively review Giftit?

Users have positively reviewed Giftit due to its human-like interaction and unique ability to generate gift ideas. The app's ability to initiate engaging and relevant conversations makes it feel like a friendly chat, which users appreciate.

Why is Giftit considered user-friendly?

Giftit is considered user-friendly due to its straightforward operation. Users start by selecting a contact, and Sherlock proceeds to interact with them. Users can then view the outcomes of this interaction, aiding in their gift selection process. All steps involve minimal input, making it a hassle-free process.

Where is Giftit created and managed?

Giftit is created and managed in Europe, as per the information available on their website.

Can I get a full conversation transcript of Sherlock's interaction?

Yes, users have the option to view a full transcript of Sherlock's interaction with their chosen contact. This feature allows users to gain a thorough understanding of the conversation that took place, aiding in their ultimate gift selection.

Is there an option to get a summary of the conversation instead?

Yes, besides providing a full transcript, Giftit also offers users an AI-generated summary of the conversation between Sherlock and their contact. This allows users who prefer a quick glance at the key points to make a well-informed gift choice.

How does Giftit contribute to surprise gifting?

Giftit contributes to surprise gifting by keeping the user anonymous during Sherlock's conversation with the friend. Sherlock conducts the conversation in such a way that the friend doesn't realize they are specifying their gift preferences, thus keeping the gift a surprise.

Will the person know that it's Sherlock asking them questions?

No, the person will not know that it's Sherlock, the AI persona of Giftit, asking them questions. All interactions Sherlock conducts are completely anonymous, maintaining surprise and authenticity.

What is the function of automated conversations in Giftit?

The function of automated conversations in Giftit is to understand the gift preferences of a user's selected contact. These automated chats conducted by Sherlock save the user's time and effort while ensuring accurate gift suggestions.

How does Giftit work?

Giftit works in three simple steps - users start by selecting a contact, followed by anonymous and automated conversations conducted by Sherlock with the selected friends. After the chat, users can view the conversation results in the form of either a full transcript or an AI-generated summary, aiding them in their gift selection.

How does Sherlock ask the right questions?

Sherlock uses its AI algorithms to ask the right questions. It processes the responses from the selected contact, allowing it to engage in relevant discussions and understand their preferences. The exact mechanism is proprietary to Giftit.

Can Sherlock interact with my contacts from my chosen messaging app?

Yes, Sherlock can interact with your contacts from your chosen messaging app. It is designed to be compatible with popular messaging platforms such as WhatsApp and iMessage.

Can Giftit help me with spontaneous gifting moments?

Yes, Giftit can assist with spontaneous gifting moments. It can easily help you find the perfect gift for your loved ones, regardless of the occasion or the reason, maintaining the element of surprise.

Is Giftit available globally or just in Europe?

Although Giftit is created and managed in Europe, there is no information specifying any geographical restrictions on its website. Hence, it's safe to assume that Giftit can be used globally.
