Frequently Asked Questions

How can I install WebChatGPT on my Chrome?

WebChatGPT can be installed from the Chrome Web Store. Just search for 'WebChatGPT', click 'Add to Chrome', and follow the prompts.

How does WebChatGPT enhance the user experience on ChatGPT?

WebChatGPT enhances the user experience on ChatGPT by including relevant web results to the conversation. It can inject modified prompts directly into ChatGPT's API calls, which can make the conversations more accurate and up-to-date.

What is the role of WebChatGPT's relevant web results in modifying prompts?

Relevant web results help to provide up-to-date contextual information during the conversation. They are injected directly into ChatGPT's API calls. This makes the conversation more precise and relevant to the user's prompts than it would be relying solely on ChatGPT's internal database.

Can anyone review the source code of the WebChatGPT project?

Yes, anyone can review the source code of the WebChatGPT project. As it is an open-source project, the source code is publicly available for anyone to review and contribute to. You can find it on GitHub at <https://github.com/qunash/chatgpt-advanced/>.

What permissions does WebChatGPT require to function?

WebChatGPT asks for the bare minimum permissions to function. Specific permissions required have not been indicated on their website.

Does WebChatGPT collect user data during conversations?

No, WebChatGPT does not collect any user data during conversations. It is designed with privacy in mind, only asking for basic permissions and not collecting user data.

Can WebChatGPT be used with any language?

Yes, WebChatGPT is compatible with a variety of languages. However, the specific languages it supports have not been specified on their website.

How does WebChatGPT maintain the accuracy and relevance of conversations?

By adding relevant web results to your prompts, WebChatGPT maintains the accuracy and relevance of conversations. The web results provide up-to-date information that complements the internal database of ChatGPT, offering more accurate responses to user prompts.

What is the function of the toggle in WebChatGPT?

The function of the toggle in WebChatGPT is to minimize web searches as they can often clutter the chat screen. It enables users to manage the presence of search results in the chat, making the conversation cleaner and smoother.

How does WebChatGPT manage to avoid cluttering the chat screen with web searches?

WebChatGPT manages clutter by providing a toggle to minimize web searches. This ensures that your chat screen remains clear and not overwhelmed with excessive information from web searches.

How is WebChatGPT different from regular chatbots?

WebChatGPT differs from regular chatbots in that it uses relevant web results to enhance conversations. It injects modified prompts directly into ChatGPT's API calls, creating more accurate and up-to-date dialogue, an aspect you don't typically find with regular chatbots.

Is WebChatGPT available for other browsers apart from Chrome?

What does it mean that WebChatGPT is an open-source project?

As an open-source project, WebChatGPT's source code is publicly available. This means anyone can access, review, and contribute to its improvement, fostering a community of collaborative development.

Does WebChatGPT keep a record of my past searches or conversations?

WebChatGPT does not collect any user data. Therefore, it does not keep a record of past searches or conversations from its users.

How do I turn off the web search function in WebChatGPT?

You can turn off the web search function in WebChatGPT by using the toggle provided within the extension.

Where can I contribute to the WebChatGPT project source code?

You can contribute to the WebChatGPT project source code via GitHub. The site is <https://github.com/qunash/chatgpt-advanced/>, and it allows anyone with modifications or improvements to contribute to the project.

Does WebChatGPT work with a specific version of ChatGPT?

The version with which WebChatGPT works has not been specified on their website. It should work with the most recent version of ChatGPT, but for the best results, always ensure you have the latest version.

Why is the ChatGPT inaccurately injecting prompts using WebChatGPT?

Based on reviews on the Chrome Web Store, some users have noted instances of injected prompts coming across as inaccurate or irrelevant. However, the exact cause of these inaccuracies could vary widely and would require more detailed exploration.

How do I modify the settings on WebChatGPT for optimized usage?

It hasn't been specified on their website how to modify the settings of WebChatGPT for optimized usage. However, it does feature a toggle to minimize web searches, which can help in decluttering the chat screen.

Can I use WebChatGPT on my mobile device's Chrome application?

It's not stated on their website whether WebChatGPT can be used on a mobile device's Chrome application. However, since it is a browser extension, it's likely designed primarily for use on desktop browsers.
