- Requires crypto for features
- Referral program tied to points
- Potential blockchain transaction costs

#### ADDITIONAL LIMITATIONS

- ⚠ Dependent on AVAX blockchain
- ⚠ Yet to launch
- ⚠ 2024
- ⚠ Limited to beauty services

## Frequently Asked Questions

### What is SuperBooking?

SuperBooking is an AI-powered tool that simplifies and streamlines the process of booking beauty services. Using the AVAX blockchain for secure transactions, it ensures that all reviews on the platform are 100% verified to eliminate fake reviews. Users can book a range of beauty services such as hair salons, nail salons, skin treatments, and day spas. It features an AI booking assistant named 'Zippy' that provides business recommendations and displays 5-star rated businesses. Users can pay...

### How does SuperBooking work?

SuperBooking makes it easy for users to book beauty services through its integrated AI assistant, Zippy. Users can engage with Zippy to get recommendations on businesses and services, gain insight about specific types of services, or inquire about businesses with 5-star ratings. It offers multiple payment options and a feature to convert user points into \$SN, its designated token. This allows users to fund their in-app wallets and complete transactions from there.

### Why does SuperBooking use AVAX blockchain?

SuperBooking uses the AVAX blockchain to provide a platform for secure transactions. Blockchain serves as a decentralized and immutable ledger which enhances the security and transparency of financial transactions on the platform.

### Can SuperBooking ensure all reviews on the platform are authentic?

Yes, SuperBooking ensures all the reviews on its platform are authentic. By integrating with the AVAX blockchain, it verifies and validates all reviews, hence, weeding out any possibility of fake reviews.

### What beauty services does SuperBooking cover?

SuperBooking hosts a variety of beauty services including, but not limited to, bookings for hair salons, nail salons, skin treatments, day spas, and more.

### Who is Zippy in SuperBooking?

Zippy is an AI booking assistant integrated into SuperBooking. It provides recommendations on businesses and services, information on 5-star rated businesses, and insights about specific types of services.

### What types of recommendations can Zippy provide?

Zippy can recommend businesses and services, provide information on businesses with 5-star ratings and offer insights about specific types of services.

### What types of payment does SuperBooking accept?

SuperBooking accepts various types of payments including but not limited to credit cards, debit cards, cryptocurrencies, and GBP deposits.

### Can I convert my user points into \$SN tokens in SuperBooking?

Yes, within SuperBooking, users can convert their earned points into the platform-specific token, designated as \$SN. This feature allows users to fund their in-app wallets and make transactions from the same.

### When will SuperBooking be launched?

SuperBooking is set to have its early access launch in the year 2024.

### How does the SuperBooking referral program work?

In the SuperBooking referral program, users can earn points by referring the tool to others. These points can then be converted into \$SN, the SuperBooking token for transactions within the application.

### How secure is the payment in SuperBooking?

SuperBooking provides secure transactions through its integration with the AVAX blockchain, offering a secure and transparent environment for financial dealings. It supports various types of payments including credit cards, debit cards, cryptocurrencies, and GBP deposits.

---

### **How can I engage with Zippy in SuperBooking?**

Users can engage with Zippy, the AI assistant in SuperBooking, to receive recommendations on businesses and services, get information on 5-star rated businesses, and glean insights about specific types of services.

---

### **What does SuperBooking offer to its early-access users?**

Early-access users are given the opportunity to become part of the exclusive friends list, gaining pre-launch app access and bonus points. The first 1000 sign-ups receive these benefits.

---

### **Does SuperBooking support prepayment for bookings?**

Yes, SuperBooking supports prepayment methods for bookings. This feature allows users to pay ahead of time, ensuring a seamless booking experience.

---

### **What types of services can I get insights from Zippy in SuperBooking?**

Zippy, the AI assistant in SuperBooking, provides insights about various types of beauty services available on the platform. It allows users to request information on specific services or businesses, enhancing the booking experience.

---

### **How does SuperBooking handle fake reviews?**

SuperBooking uses AVAX blockchain technology to verify every review on its platform, thus ensuring the elimination of fake reviews. The use of blockchain technology also adds a layer of transparency and authenticity to every user review.

---

### **Can SuperBooking help me find a business that has a 5-star rating?**

Yes, within SuperBooking, users can ask Zippy, the AI assistant, to provide information on businesses that have a 5-star rating. Zippy's algorithm processes user preferences and data on the platform to provide the most accurate and fitting recommendations.

---

### **Is there an in-app wallet in SuperBooking?**

Yes, SuperBooking features an in-app wallet that can be funded using various payment methods or converting user points into \$SN, the SuperBooking token.

---

### **What is the role of SuperBooking token?**

The SuperBooking token, abbreviated as \$SN, is used within the SuperBooking platform for in-app transactions. Users can convert their earned points into \$SN to fund their in-app wallets and make payments for services. This provides greater convenience and ease of use within the SuperBooking ecosystem.
