### What It Does

Cursor is an AI-powered code editor built on VS Code that offers the most powerful in-IDE AI coding experience available. It provides codebase-aware suggestions, multi-file editing (Composer), natural language code editing, terminal command generation, and automatic error fixing. It's become the editor of choice for professional developers who want AI deeply integrated into their workflow.

CONTENT QUALITY

**96/100**

USEFULNESS SCORE

**97/100**

## Pros

### + What Works Well

- + Codebase-aware AI context
- + Multi-file editing with Composer
- + Familiar VS Code interface
- + GPT-4 and Claude models
- + Autocomplete + chat + edit modes

## Cons

### - Limitations to Consider

- Paid for best features
- Privacy concerns — code sent to AI

---
