What It Does

Bolt.new is an AI-powered development environment by StackBlitz that lets you build full-stack web applications entirely in the browser. Powered by Claude, it can install packages, run servers, debug errors, and deploy apps — all without any local setup. It's one of the fastest ways to go from idea to deployed app, making it hugely popular for vibe coding and rapid prototyping.

CONTENT QUALITY

91/100

USEFULNESS SCORE

93/100

Pros

+ What Works Well

- + In-browser development — no setup
- + Full-stack: frontend + backend + DB
- + Instant preview and deployment
- + Package installation support
- + Claude-powered AI

Cons

- Limitations to Consider

- Resource limits on free tier
- Complex projects may need manual tweaks
