Frequently Asked Questions

What is ChatGPT for Outlook?

ChatGPT for Outlook is an add-in that allows users to run ChatGPT, a language model developed by OpenAI, within the Outlook email client. The tool allows users to generate responses to emails based on their own prompts, directly within the Outlook interface. It is created by Blueberry Consultants, a company that is not affiliated with OpenAI or Microsoft, although they are Microsoft Partner

How does the ChatGPT for Outlook work?

ChatGPT for Outlook works by using custom prompts to guide ChatGPT in generating relevant summaries or highlights based on user needs. It operates directly within the Outlook interface, where users can choose to process the entire email or only certain sections. The generated output can either replace the original email body for easy comparison or be displayed in a separate window. Consequently, the add-in can update emails' importance based on generated output, such as marking it as high...

Can you customize the prompts on ChatGPT for Outlook?

Yes, ChatGPT for Outlook allows you to install custom prompts to guide ChatGPT in generating relevant summaries or highlights based on your specific needs.

What key features does ChatGPT for Outlook offer?

Key features of ChatGPT for Outlook include the ability to install custom prompts to generate relevant information, process entire emails or specific sections, display output separately or replace the original email body, update emails' importance automatically based on output, and manage multiple configurations for different emails or scenarios.";

Can ChatGPT for Outlook update email importance automatically?

Yes, the ChatGPT for Outlook tool can automatically update the email's importance based on the generated output, including flagging it as high priority or marking it as important.

What is the function of multiple configurations in ChatGPT for Outlook?

Multiple configurations in ChatGPT for Outlook allow users to manage various setups for different types of emails or scenarios. Each configuration has its own set of conditions, prompts, and display preferences.
