– No desktop app
– Periodic sending to avoid spam

> **ADDITIONAL LIMITATIONS**
>
> ⚠ Pricing per email
> ⚠ Limited CRM integrations
> ⚠ Depends on external input
> ⚠ No offline functionalities

Frequently Asked Questions

What is Luna?

Luna is an AI-powered tool designed specifically for sales lead generation and personalizing cold email outreach. It employs neural network technology to identify leads that match user-specific criteria, with all profiles being 100% verified. Luna also offers personalized cold email suggestions for each lead. Luna continually learns and improves its service based on user feedback. It can be integrated with HubSpot, Pipedrive, and over 5,000 other applications via Zapier.

How does Luna work to personalize cold emails?

Luna uses an artificial intelligence algorithm that has been trained to craft personalized cold emails. It examines the prospect's website for personalised outreach. The AI generates message suggestions using an extensive language model with 175 billion parameters. Users can either approve, modify or deny the suggestions made by Luna. Over time, this feedback allows Luna to learn and improve.

What kind of businesses can use Luna?

Luna is suited for several types of businesses, particularly those involved in sales and seeking an effective lead generation solution. Whether you're running a startup or established company, if your operation involves cold email outreach for lead generation, Luna can be a valuable tool to streamline and personalize the email creation process.

How does Luna's neural network technology help in sales lead generation?

Luna's neural network technology works by examining user feedback to improve its email and lead suggestions. Specifically, it examines the response or interaction with a suggested email or lead to determine if the suggestion was beneficial. By learning from this feedback, Luna can continually improve the quality of its lead and email suggestions, proving its utility in sales lead generation.

What are the requirements to use Luna?

To use Luna, you don't need any specific third-party software licenses. Luna is a standalone solution, and you do not need to use any other tools, such as Sales Navigator or data enrichment tools like Hunter.io or DropContact. Luna encompasses everything you need to boost your sales process.

What type of leads does Luna provide?

Luna provides highly targeted leads based on the user's business proposition. The leads are 100% verified and tailored specifically to match your offer. Luna's extensive database boasts millions of leads, allowing for a diverse and high-quality selection.

Can Luna give me leads that match my business proposition?

Yes, Luna can provide leads that exactly match your business proposition. During the onboarding process, Luna asks a series of questions to understand what type of leads would best suit your business. Luna's AI then uses your responses to these questions to search its database of millions of leads and make suggestions. Over time, Luna learns from your decisions to approve or deny suggested leads, therefore improving the relevancy of future proposals.

How does Luna verify the profiles of the leads?

Luna verifies the profiles of the leads using its inbuilt AI technology before suggesting them to you. The process ensures that all proposed leads are 100% verified, thereby doing away with stale or invalid contacts.

How does Luna integrate with HubSpot and Pipedrive?

Luna integrates seamlessly with HubSpot and Pipedrive. Once connected, it allows you to keep track of email conversations within your chosen CRM system. Luna's native integrations facilitate synchronization, making it easy for your entire sales team to access and utilize it.

Can I connect Luna with other apps?

Yes, you can connect Luna with over 5,000 other applications. This is achieved through Zapier, an online automation tool that allows you to automate tasks across different apps.

How much does Luna cost?

Luna has a varied pricing model to accommodate different business sizes and needs. Its plans range from free to $0.40 per email, i.e., 25 emails per month for free (additional emails per colleague invitation) and 250 emails per month for $100. Pricing plans cap at $0.25 per email, i.e, 10,000 emails per month for $2500.

Are there any security measures Luna has in place to protect my email account?

Luna has been officially approved by Google and Microsoft, which means it has undergone thorough security testing. To protect your email account, Luna only sends messages with your explicit permission and sends the emails at random times throughout the day – never in bulk to prevent them from being classified as spam. Also, your login details are always encrypted for maximum security.";

How does Luna learn from user feedback?

Both rejected and accepted suggestions contribute to Luna's learning process. Luna uses these interactions to train its AI, improving the relevancy and quality of its lead and email suggestions over time. By monitoring user feedback and evaluating user satisfaction, Luna adapts to deliver more efficient and accurate results.

How does Luna make sure that the emails do not end up in the spam folder?

To ensure that the emails don't end up in the spam folder, Luna sends messages at random times throughout the day and never in bulk. This strategy reduces the probability of the emails being classified as spam, thereby improving their likelihood of reaching the intended recipient's inbox.
