− Performs better with multiple sources
− Complicated conversation analytics
− Partial brand customization
− Reliant on data relevancy

ADDITIONAL LIMITATIONS

⚠ Limited free trial

⚠ Depends on data quality

⚠ Training requires separate uploads

⚠ Noisy conversations may confuse

▌ Frequently Asked Questions

What is Instant Answers?

Instant Answers is an AI-powered chatbot builder that enables users to easily create, customize, and train chatbots capable of providing real-time responses to website visitor inquiries. The tool enhances user experience and automates customer service by allowing chatbot integration into websites, offering data versatility for training, and empowering users with the ability to align brand aesthetics.

How does Instant Answers train the chatbot?

Instant Answers uses an intuitive training process for chatbots. Users can upload content in various digital formats such as PDF, TXT, CSV, DOCX or directly input their website URL. This data serves as the instructional material from which the chatbot structure and knowledge base is built.

Does Instant Answers require coding skills?

No, Instant Answers does not require any coding skills. It provides an easy-to-use interface and offers two methods of integration, namely a floating chat bubble or an iframe. Both options can be embedded into a website simply by copying and pasting a provided script.

What customization options does Instant Answers offer for the chatbot?

Instant Answers allows users to effortlessly customize the appearance of their chatbots to match brand color and style. It provides a user-friendly interface that simplifies these customization processes into a few easy steps.

How does Instant Answers ensure the chatbot's accuracy?

Instant Answers ensures the accuracy of the chatbots by relying on the quality and relevance of the data provided for training. The system promises better accuracy of responses with high-quality and relevant data.

Can I train my chatbot using multiple documents or websites with Instant Answers?

Yes, Instant Answers allows the training of chatbots using multiple documents or websites. Users can upload each source separately, which the system then combines to create a comprehensive knowledge base for the chatbot.

What security measures does Instant Answers use?

Instant Answers takes data security seriously by using industry-standard encryption and security measures. This approach provides an extra layer of trust and assurance for users, ensuring their data is well-protected and secure.

What plans does Instant Answers offer?

Instant Answers offers a free trial for users, allowing them to create and test a chatbot with limited data capacity. After the trial, users can upgrade to a paid plan to unlock additional features and data capacity.

How does Instant Answers integrate the chatbot into websites?

Instant Answers integrates the chatbot into websites using two methods, through a floating chat bubble or an iframe. Both can be embedded into the website by simply copying and pasting the provided script code.

What data formats does Instant Answers support for document uploads?

Instant Answers supports the upload of numerous document formats for chatbot data training, including PDF, CSV, TXT, DOCX, and URLs. This versatility in data inputs allows a broad span of data sources, contributing to more comprehensive and nuanced chatbot responses.

Does Instant Answers analyse chatbot conversation trends?

Yes, Instant Answers includes features for conversation analysis and data export. This enables users to review chatbot conversations, identify trends and export data in CSV or JSON format for further analysis, which aids in improving chatbot performance.

Which languages does Instant Answers support?

Instant Answers' platform supports multiple languages including English, Spanish, French, German, Italian, Portuguese, Dutch, Russian, Japanese, Korean, Chinese, and many more. This allows businesses to cater to a global audience.

Can I use the Instant Answers chatbot for customer support?

Yes, the chatbot created through Instant Answers can be used to provide customer support and answer frequently asked questions. This can greatly enhance overall customer service and user experience on the website.

Can I adjust the appearance of my chatbot to match my brand's aesthetics with Instant Answers?

Indeed, Instant Answers enables you to adjust the appearance of your chatbot to match your brand's aesthetics. Its user-friendly interface makes it simple to align the chatbot's look and feel with your brand design.

How broad is Instant Answers' website builder compatibility?

Instant Answers possesses broad compatibility with major website builders such as WordPress, Wix, Webflow, Squarespace, and Shopify, ensuring easy deployment regardless of the platform hosting your website.

What happens during the free trial of Instant Answers?

During the free trial of Instant Answers, users can create and test a chatbot with limited data capacity. The trial allows users to experience the tool's functionality before deciding to upgrade to a paid plan for full access to additional features and increased data capacity.

Is it possible to create a chatbot in seconds with Instant Answers?

Yes, using Instant Answers it is indeed possible to create a chatbot in mere seconds. After inputting your website or document, Instant Answers extracts the data and your chatbot will be ready to utilise quickly.

What pros can I expect from using Instant Answers in enhancing customer experience?

Instant Answers enhances customer experience by enabling immediate, real-time responses to customer inquiries, automating the customer support process, offering a customizable appearance for brand congruity, and catering to a global audience through multi-language support.

How does Instant Answers handle data privacy and exportation?

Instant Answers ensures data privacy through the use of industry-standard encryption and security practices, thereby safeguarding user data. In terms of exportation, Instant Answers allows data extraction in CSV or JSON formats for further analysis or usage.

Does Instant Answers support dynamic learning for the chatbot?

Yes, Instant Answers supports dynamic learning for the chatbot. Users can update the chatbot's knowledge base at any time by adding more data sources or removing them as needed, allowing for the chatbot to evolve and adapt over time.
