Cons

➖ Limitations to Consider

– Costly pricing plans
– No free plan available
– Limited user per plan
– Free bots deleted after 30 days
– No self-hosting in basic plans
– Limited source refresh frequency
– Anonymity requires Business plan
– No WordPress plugin yet

ADDITIONAL LIMITATIONS

⚠ Costly pricing plans
⚠ No free plan available
⚠ Limited user per plan
⚠ Free bots deleted after 30 days

▎Frequently Asked Questions

What is DocsBot AI?

DocsBot AI is a managed service that offers custom chatbots and content generation based on your documentation. It provides an intuitive interface for indexing your business' documentation, blog posts, or other content. Developers can build custom chatbots powered by ChatGPT that are trained with this content. It also provides the ability to create question/answer bots, custom copywriting, auto-reply to support tickets, internal knowledge bots, and more. The bots can provide instant answers to...

How does DocsBot AI work?

DocsBot AI works by indexing your documentation, blog posts, or other provided content. Once the content is indexed, it can be utilized to train ChatGPT-powered bots to automatically answer customer queries. These bots can be embedded integrally into your website, app, WordPress, or Slack using the provided API and widgets. DocsBot also allows automatic reply to support tickets and offers interactive Q/A bots. It can export data directly from many sources like Notion, Google Drive, Dropbox,...

How can DocsBot AI train chatbots?

DocsBot AI trains chatbots using a customer's provided content such as documentation, blog posts, or other indexed information. This content serves as the training material for the AI, enabling it to efficiently answer inquiries based on the specific data of the business. For example, a bot could be trained on a company's FAQ page, enabling it to provide instant answers to commonly asked questions.

What types of files can be uploaded to DocsBot AI?

DocsBot AI allows the upload of numerous file formats including TXT, DOC, PPT, EML, HTML, and PDF. Additionally, files can be uploaded in bulk via ZIP. DocsBot AI also enables users to index their blog content via WordPress export files or RSS feeds. Moreover, DocsBot AI is capable of indexing and learning from the transcripts of a YouTube video or channel.

How does DocsBot AI integrate with websites, apps, and plugins?

DocsBot AI integrates with websites, apps, and plugins through a simple API and embeddable widgets. These tools allow businesses to easily add DocsBot AI to their interfaces and provide their users with instant access to the AI-powered chat functionality. This implementation not only supports direct interaction with customers on the website or app but also allows for integration with other platforms like Slack.

Can DocsBot AI auto-reply to support tickets?

Yes, DocsBot AI has the capability to auto-reply to support tickets. This functionality can be achieved by training the DocsBot with your support history and associated documentation. This allows DocsBot to provide automatic responses to new tickets, saving time and improving efficiency in customer support.

What are the capabilities of DocsBot's powerful API?

The powerful API provided by DocsBot AI allows businesses to integrate AI chat into their products, providing on-site answers to user inquiries. This includes incorporating AI chat into an app, website, or WordPress plugin. The API also supports advanced features like indexing of your existing content, creating question/answer bots, exporting data for integration with several cloud sources, and automating responses to support tickets.

Can DocsBot AI train bots from blog content?

Yes, DocsBot AI can quickly train your bots on your blog content. This can be done by using WordPress export files or RSS feeds. This feature helps bring your best content to the foreground for users seeking answers, enhancing their experience and the utility of the bot.

Does DocsBot AI support bulk importing of content?

Yes, DocsBot AI supports bulk importing of content. Users can upload a specially formatted CSV file containing text blocks and sources to index. This allows for efficient transfer, organization, and utilization of large amounts of information, facilitating the swift creation of comprehensive and powerful AI bots.

What custom copywriting tools does DocsBot AI provide?

DocsBot AI provides custom copywriting tools that help in generating content. Users can leverage a customized ChatGPT that knows everything about their product, enabling the generation of high-quality content swiftly. This includes help with writing marketing copy and blog posts.

How is data exported from DocsBot AI?

DocsBot AI can export data directly from several sources including Notion, Google Drive, Dropbox, Intercom, or OneDrive. The exported data can be indexed and used to train DocsBot, broadening the knowledge base of the AI and improving its performance in responding to user inquiries.

Can DocsBot AI be used to train internal knowledge bots?

Yes, DocsBot AI can be used to train internal knowledge bots. This can be achieved by indexing the business' internal knowledge base and documentation. These internal knowledge bots can help employees find necessary information instantly, thereby saving time spent on manual searches.

What customer support functions can DocsBot AI automate?

DocsBot AI automates several customer support functions. It can provide instant answers to frequently asked questions from customers, provide auto-replies to support tickets, create Q/A bots that provide detailed and direct answers about your product, and make the documentation interactive, enhancing the overall customer support efficiency.

Does DocsBot AI provide customizable widgets?

Yes, DocsBot AI does provide customizable widgets. These widgets make it simple to add DocsBot AI into your website in a few minutes. The complete customization allows businesses to maintain brand consistency, and seamlessly integrate the chatbot into their existing web presence.

Is there a limit to the number of source pages I can use in DocsBot AI?

While specific documentation on the limit of source pages is not available from their website, their pricing plans suggest different tiers have varied limits on the number of source pages. For example, the 'Power' plan includes 5,000 source pages whereas the 'Pro' plan includes 10,000 source pages.

How does DocsBot AI improve team productivity?

DocsBot AI enhances team productivity by providing instant answers to internal inquiries. By training AI bots with the company's indexed internal knowledge base and documentation, employees can get answers instantly, thereby saving the time spent on manual information searches. The ability to resolve repetitive queries instantly leaves more time for employees to focus on other important tasks, thereby enhancing productivity.

Can DocsBot AI bots answer detailed customer queries instantly?

Yes, DocsBot AI bots are trained to be able to answer detailed customer queries instantly. The training process utilizes your business' specific content and documentation. This enables DocsBot to provide highly accurate and detailed responses instantly, significantly optimizing the customer service process.

Can DocsBot AI be integrated into Slack?

Yes, DocsBot AI can be integrated into Slack through their simple API and embeddable widgets. This flexibility means you can utilize DocsBot wherever your team or customers are, resulting in a more streamlined communication process across different platforms.

What are the pricing plans for DocsBot AI?

DocsBot AI offers different pricing plans to cater to various needs. They offer four main plans named 'Hobby', 'Power', 'Pro', and 'Business'. The 'Hobby' plan starts at $16 per month offering 1k source pages and a user limit of 1.

The 'Power' plan priced at $41 per month offers 5k source pages and also has a user limit of 1. The 'Pro' plan, priced at $83 per month, offers 10k source pages and has a user limit of 5. The 'Business' plan costs $416 per month, offering 100k source pages and a user...

What businesses are currently using DocsBot AI?

DocsBot AI is trusted and used by a variety of businesses including Infinite Uploads, Sony, Extendify, Conversion, Dollie, WingArc1st, and SENTRY.io. The versatility and customizability of DocsBot AI make it a reliable solution for many businesses across various industries.
