− Premium required to remove branding

ADDITIONAL LIMITATIONS

⚠ Message credits limitation
⚠ Character count limitation
⚠ Limited file types support
⚠ No multi-language support

Frequently Asked Questions

What is Pika?

Pika is an AI tool that enables businesses to create customizable chatbots for customer support and Q&A sessions. Users can create these chatbots using their own content, which could be in the form of PDF files, CSV, TXT, DOCX, as well as public Notion links and webpage links. These chatbots can be embedded on unlimited websites with just a simple line of code.

How does Pika ChatGPT work?

Pika ChatGPT works by learning from the text in the files that you upload to it. This could be your product or service information, user manuals, tutorials, or any other content. Once uploaded, Pika ChatGPT can automatically create a chatbot that is capable of answering questions about your product based on the information it has learned.

What kind of content can I use to create a chatbot with Pika?

With Pika, you are able to use your own content including PDF files, CSV, TXT, DOCX files, as well as public Notion links and web page links to create a chatbot.

What customization options does Pika offer?

Pika offers various customization options such as the profile picture of the chatbot, the color theme, greeting message, and the length of the responses it provides. These features help you build a chatbot that suits your brand's identity and persona.

How can I embed Pika chatbots on my website?

Pika chatbots can be easily embedded on your site by simply copying and pasting a line of code into your web page.

What technologies power Pika?

Pika is powered by the latest AI technology, GPT4. This technology enables Pika to understand and process natural language inputs, thus providing relevant and accurate responses.

What file types does Pika support?

Pika supports various file types including PDF, CSV, TXT, DOCX, and also public Notion links and webpage links.

What are the pricing plans for Pika?

Pika offers a variety of pricing plans tailored to serve different business needs. These plans range from $19.99/month to $299.99/month. Depending on the plan chosen, users get a variety of features like personal chat, up to 40 chatbots, 2,000 to 40,000 message credits per month, and 2,000,000 to 11,000,000 characters per chatbot.

Do I get a money-back guarantee with Pika?

Yes, Pika offers a 7-day money-back guarantee for users who wish to discontinue their subscription for any reason.

What kind of customer support does Pika offer?

Pika offers web chat and email support to all its users, and advanced plans offer additional Zoom support.

What kind of analytics does Pika provide?

Pika provides analytics that help businesses understand user interactions and response patterns. They can use this data to improve their chatbot's performance and customer engagement.

Is there a limit to how many chatbots I can create with Pika?

The number of chatbots you can create with Pika ranges from 5 to 40, depending on the chosen pricing plan.

How many message credits do I get with Pika?

With Pika, users receive anywhere from 2,000 to 40,000 message credits per month based on the plan they subscribe to.

How many characters can be input per Pika chatbot?

The character input limit per Pika chatbot ranges from 2,000,000 to 11,000,000 characters, depending on the pricing plan you choose.

How can Pika turn my knowledge base into a chatbot?

Pika turns your knowledge base into a chatbot by learning from the files you upload. The AI then answers questions about your product or service based on the information in these files.

Who is Pika suitable for?

Pika is suitable for anyone who wants to create personalized chatbots using their own content. They may be small business owners, large corporations, nonprofits or individuals seeking efficient customer support and Q&A assistance on their web platforms.

How compatible is Pika with other websites?

Pika is compatible with most popular websites, ensuring businesses across various platforms can take advantage of its customizable AI chatbots.

Can I try before I buy with Pika?

Yes, you can take an embeddable Pika chatbot for a test drive to experience its functions and features before making a purchase.

What is the process of creating a chat with Pika?

To create a chat with Pika, you first add your content by either dragging and dropping files or inputting public Notion links and web page links. Then, customize your chatbot's profile picture, color theme, greeting message, etc. Afterward, the chatbot learns the information in less than a minute and is ready for interaction.";
