CONTENT QUALITY

82/100

USEFULNESS SCORE

100/100

Pros

➕ What Works Well

+ Quickly drafts updates
+ Shares via Slack and email
+ Workflow optimization
+ Collaboration options
+ Privacy and security features
+ Reduces administrative tasks
+ Accurate meeting summaries
+ Seamless workflow integration
+ Meeting best practice guidance
+ Automated weekly recaps
+ Action-item synchronization
+ Transparency in decision-making
+ Centralized meeting review

+ Access to transcripts
+ Decision history tracking
+ Committed to deleting raw-recordings
+ Plans for SOC II certification
+ No software download required
+ Free sign up available
+ Automated follow ups
+ Saves previous 1:1s
+ Integrated with product development tools
+ Explainability built into summaries
+ Syncs action items in 1-click
+ Robust permissions & settings

Cons

➖ Limitations to Consider

− No offline access
− No multi-language support
− No mobile app
− Not SOC II certified yet
− Limited editing options
− Retains Data for 90 Days
− Lack of Live Support
− Missing native calendar integration
− No task prioritization capabilities
− No free version available

> **ADDITIONAL LIMITATIONS**
>
> ⚠ No offline access
> ⚠ No multi-language support
> ⚠ No mobile app
> ⚠ Not SOC II certified yet

Frequently Asked Questions

What is Broadcast?

Broadcast is an artificial intelligence-powered tool designed to assist with meeting management. It aids in capturing meeting notes, tracking decisions, and automating follow-up tasks and substantially reduces administrative work. It integrates seamlessly with existing workflows and offers best practice guidance tailored to specific team's needs and meeting types.

How does Broadcast use AI to generate weekly updates?

Broadcast uses a feature known as AI Writer that helps in generating text from data and auto-filling key metrics and numbers. This allows it to create fast and accurate weekly updates without any manual intervention.

Can Broadcast distribute updates across multiple platforms?

Yes, Broadcast does provide the option to distribute updates across multiple platforms. Users can set up all their updates in a single pane and then distribute them easily across their chosen platforms.

Does Broadcast edit meeting notes based on input?

Broadcast does have collaboration options that allow for editing and replying. This suggests that it does indeed facilitate edits to meeting notes based on user input. However, specific details about this feature are not mentioned.

How does Broadcast use AI for writer's block?

Broadcast uses AI Writer, a feature that can auto-generate text from given data. This not only helps in automatically filling in key metrics and numbers, but also aids in overcoming writer's block by enabling quick and effortless generation of content.

How secure is data through Broadcast?

To ensure data security, Broadcast deletes raw recordings after 90 days while preserving the summaries. The tool is also committed to obtaining the Service Organization Control Type 2 certification by 2024, showcasing its bullish approach towards securing user data.

Does Broadcast integrate with other workflows?

Yes, Broadcast is designed to integrate seamlessly with existing workflows. It helps to bridge the gap between meetings and existing product development tools, enhancing efficiency and productivity.

How can Broadcast be a productive tool for managers?

Broadcast can be a highly productive tool for managers as it cuts down on administrative tasks associated with meetings. It auto-generates meeting summaries, tracks decisions, automates follow-up tasks, and provides easy access to meeting transcripts and decision histories. This allows managers to focus more on their actual duties rather than getting bogged down by administrative work.

What kind of meeting types does Broadcast support?

Broadcast supports various kinds of meeting types, tailoring its services according to the specific meeting type. These could include Sprint Planning, 1:1s, or Retros.

How does Broadcast sync action-items with other tools?

Broadcast can sync action-items with your tools in a single click. While specific details about the process are not provided, the quick syncing capability implies seamless communication and task management across various productivity tools.

How does Broadcast generate meeting recaps?

Broadcast sends automated weekly recaps of the meetings. The tool uses AI to summarise the meeting notes which are then shared as recaps.

Is there a feature that allows for transparency in Broadcast's decision-making?

Yes, Broadcast prioritizes transparency in its decision making. With explainability built into their summaries, it provides insights into how the conclusions were derived, contributing to a more transparent decision making process.

Can the Broadcast tool refer back to previous meetings?

Yes, Broadcast allows users to quickly refer back to previous meetings. It centralizes all your meetings, allowing for easy access and review. Transcripts of meetings can be accessed along with a history of decisions made.

Does Broadcast offer any best practice guidance for users?

Yes, Broadcast offers best practice guidance which is tailored to your team's needs. The guidance changes based on the type of meeting, such as Sprint Planning, 1:1s or Retros.

How does Broadcast centralize all the meetings?

Broadcast centralizes all your meetings by providing a platform where everything related to the meetings can be found in one single place. This includes the meeting transcripts as well as a history of decisions made during these meetings.

What's the process of automated meeting summaries in Broadcast?

Broadcast automates the meeting summaries by using AI to extract the key points and decisions from the meetings and formulates them into a clear, concise summary. These summaries can then be shared with team members.

What is Service Organization Control Type 2 certification?

The Service Organization Control Type 2 certification is an auditing procedure that ensures a service provider securely manages data to protect the interests of the organization and the privacy of its clients. Broadcast plans to obtain this certification by 2024, indicating its commitment to data security.

How long does Broadcast keep raw recordings?

Broadcast keeps raw recordings for 90 days. After this period, the raw recordings are deleted, while the summaries are preserved.

Can Broadcast's summaries be shared with the team?

Yes, the summaries generated by Broadcast can be directly shared with the team. This not only promotes transparency but also ensures everyone is equally up-to-date with the pertinent meeting insights and decisions.

Does Broadcast AI support multiple users editing and replying?

Yes, Broadcast offers collaboration options for multiple users to edit and reply. This is beneficial for team communications and collaborative decision-making.
